+PRO TIP Are you thinking of Painted Mouldings? Finger-jointed (FJ) Primed Poplar* is real wood that features a natural woodgrain aesthetic. Homeowners and trim carpenters like this "real wood" product for its durability and cutting/ nailing characteristics. Primed MDF (medium density fiberboard) although not wood, is a one piece product that takes paint evenly. If you're looking for a premium product for paint, consider solid poplar mouldings (no finger joints). When using painted millwork, touch up of mitres and nail holes is to be expected post-installation. **Inquire with your dealer on which product is best suited for your application!**

PANEL MOULD & STOP

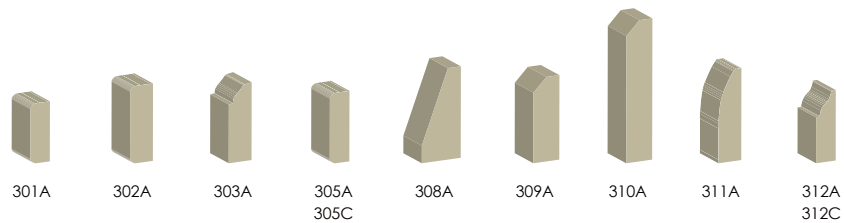

PANEL MOULD

Profile	Dimension	Birch	Oak	Pine	FJ Primed Poplar*	Primed UL MDF	Poplar	Maple
700A	3/8 x 1-1/8	•	•					
707A	5/8 x 1-3/4			•				
708A	5/8 x 1-3/4			•				
719A	3/4 x 2-1/2		•					
720A	5/8 x 2-1/2				•		•	

+PRO TIP

Maple's light color and density make it a difficult specie to stain. We recommend having it pre-finished by Bayer Built Woodworks, utilizing our Premium Stain Process or Clear Coat.
